## EDUCATION

---

### Edmond and Lily Safra International Institute of Neurosciences

*Master in Neuroengineering*

Macaíba, RN

Aug. 2019 – Jul. 2021

### Pontifical Catholic University of Minas Gerais

*Bachelor of Physiotherapy*

Belo Horizonte, MG

Aug. 2014 – Jul. 2019

### CECON.TI

*Digital Games Programming Technician*

Belo Horizonte, MG

Feb. 2012 – Nov. 2014

## EXPERIENCE

---

### Master Student

Aug. 2019 – Jul. 2021

*Edmond and Lily Safra International Institute of Neurosciences*

*Macaíba, RN*

- During my master I work with data analysis using Python, performing multi-modal data fusion, application of machine learning algorithms, video and neural data analysis.
- Experience in animal behavior, electrophysiological data analysis and surgery for electrode implantation.
- I also had the opportunity to participate in the writing and submission of funding proposals with the approval of two grants.

### Member of Machine Learning Research Group

Mar. 2020 – Present

*Edmond and Lily Safra International Institute of Neurosciences*

*Macaíba, RN*

Study group for weekly discussion of machine learning and deep learning articles and techniques. During these discussions we developed a series of projects.

- We developed projects and implemented machine learning techniques (pose estimation, autoencoder, SVM, t-SNE, GAN and others).
- Developed jupyter/colab notebooks tutorials.

### Undergraduate Experience

Aug. 2015 – Jul. 2019

*Pontifical Catholic University of Minas Gerais*

*Belo Horizonte, MG*

- Experience in multidisciplinary work with data collection with humans, performing physical assessment and application of questionnaires.
- Class monitor in different subjects, helping other students in different contents.
- Practice with the application of electrotherapeutic resources.

### Technical Course

Feb. 2012 – Nov. 2014

*CECON.TI*

*Belo Horizonte, MG*

- Development of game projects using Unity and Unreal game engines.
- Experience in programming and 3D object modeling using Blender.

## PROJECTS

---

### PyRat

Aug. 2020 – Present

*Edmond and Lily Safra International Institute of Neurosciences*

*Macaíba, RN*

In this project, we use DeepLabCut to correlate brain oscillations and behavior, evaluate the object recognition task, quantifying the time spent on each object, detachment speed, head orientation and path taken during the task. For this, Python in Rodent Analysis and Tracking (PyRat) was developed, a python library to analyze DeepLabCut outputs.

### JAMA/PyJama

Aug. 2019 – Present

*Edmond and Lily Safra International Institute of Neurosciences*

*Macaíba, RN*

JAMA is an open access device designed to perform motion analysis using inertial measurement units and microcontrollers. PyJama is a python library for analyzing human kinematics data. Aimed at analyzing data from IMU's, MIMU's, data from optical devices.

## TECHNICAL SKILLS

---

**Programming Languages:** Python, MATLAB, C/C++

**Developer Tools:** Github, Google Colab, VS Code, Visual Studio, Platform IO, Arduino, Jupyter, Anaconda

**Libraries:** pandas, NumPy, Matplotlib, Bokeh, FastAI, PyTorch, TensorFlow, scikit-learn, flask, django
